5 Conditions of Collective Impact

- **Common Agenda**: All participants have a shared vision for change including a common understanding of the problem and a joint approach to solving it through agreed upon actions.  
  * Diverse Voices * Responsive * Community Aspiration

- **Shared Measurement**: Collecting data and measuring results consistently across all participants ensures efforts remain aligned and participants hold each other accountable.  
  * Exploring * Alignment * Tracking Progress * Results

- **Mutually Reinforcing Activities**: Participant activities must be differentiated while still being coordinated through a mutually reinforcing plan of action.  
  * Weaving * System * Supportive * Centered

- **Continuous Communication**: Consistent and open communication is needed across the many players to build trust, assure mutual objectives, and appreciate common motivation.  
  * Trust * Transparency * Ongoing * Engagement

- **Backbone Support**: Creating and managing collective impact requires a dedicated staff and a specific set of skills to serve as the backbone for the entire initiative and coordinate participating organizations and agencies.  
  * Facilitate * Convener * Coordinate * Movement

Systems Coordination and Referral
What are the attributes of the current system?
What would an ideal system look like?
What critical shifts would be required to transform the system we currently have to a more ideal system?
Develop a “shared vision for change” based on the ideal system you mapped and the needed critical shifts. 20 words or less.
What is the stage of development of the lead convening agency/coalition in this area?
Are there any action steps that should be included in the CHIP around developing a convening agency/coordinating partners?
Readiness for collective action

Discuss the current system for communication among partners: Is there a formal/regular meeting? What channels are used to communicate to partners and consumers?
Readiness for collective action

Are there any action steps that should be included in the CHIP around developing better communication among community partners?
Readiness for collective action

What mutually reinforcing activities are community partners implementing (or could they be implementing) to achieve the shared vision?
Where are the more opportunities for meaningful partnership and alignment among partners?
What measurement are partners using (or could be using) to track progress toward the shared vision?
Permission to take what you’ve discussed today and develop draft goals, objectives and strategies with the Healthy Together Steering Committee and Lead Facilitating Agencies.
