

Water Quality Protection District Board will be touring the Rossiter School area on Sierra Road to discuss groundwater and groundwater projects as part of our scheduled September board meeting. See attached map for directions.

Please remember to wear proper clothing, shoes. Bring your facemask, a chair and/or umbrella.

Please RSVP to Jolene by Sept 18, 2020

## Directions to Rossiter School – Well Demonstration Location

The well is located in the park lands west of Rossiter School, as noted on the map.

Access is from Sierra Road, turning through the fences for the newly constructed flood drainage culvert.

The simplest way to get there from Helena is to drive north on North Montana, to the 4-way stop sign at Sierra Road. Turn right (east) on Sierra, and the access road (Marcella Burke Dr) will be on the right, before you arrive at the Rossiter School. The map on the back shows the location relative to Helena, for others who may want to get there following a different route.

Map shows location of Rossitor School demonstration area, The area is in the Tenmile Creek flood monitoring area, with water level monitoring locations indicated on the map.
