NOTES TO USERS

This map is for use in administering the National Flood Insurance Program and should not be used for other purposes. It was prepared under the authority of the Assistant Administrator of the Federal Emergency Management Agency, pursuant to the Flood Disaster Protection Act of 1973. The map indicates areas subject to the risk of flooding and, while it is intended to be as accurate as possible, it should be interpreted in the light of present and future changes in the environment which may not be known at the time of map publication. These changes may modify designated flood hazard areas and floodplain management requirements.

To obtain more detailed information on areas shown on this FIRM (50 ft) and base flood elevations have been determined, users are encouraged to contact the Flood Insurance Rate Map (FIRM) data provider (see list below). The base flood elevation is the elevation at which floodwater from the floodplain is expected to be in a floodway, at least once in 100 years. It is an important factor in determining the risk of flooding and is used to determine the flood insurance premium. The base flood elevation may be determined by the flood insurance rate map (FIRM) data provider or by the National Flood Insurance Program.

Center State Flood Elevations (50 ft) Flood Elevations (40 ft) and Flood Elevations (100 ft)

The FIRM (50 ft) should be used to determine the extent of flooding that could occur during a 100-year flood. The base flood elevation (BFE) is the elevation at which floodwater from the floodplain is expected to be in a floodway, at least once in 100 years. It is an important factor in determining the risk of flooding and is used to determine the flood insurance premium. The base flood elevation may be determined by the flood insurance rate map (FIRM) data provider or by the National Flood Insurance Program.

For more information on how to obtain this data, or for other flood-related questions, please contact your local floodplain manager or the FEMA Flood Insurance Rate Map Information Hotline at 1-800-425-3438.
