April, 2023

2023 Lewis & Clark County Annual Traffic Count Program Update Summary

In July of 2023, Abelin Traffic Services contracted with Lewis & Clark County to perform traffic counts for the County's annual Traffic Count Program. The Traffic Count Program is an important tool for engineers and planners to help determine growth characteristics within the County and determine where maintenance funds should be spent. Abelin Traffic Services (ATS) has previously overseen the Traffic Counting Program from 2006 to 2022. The annual traffic counting program was not conducted in 2020 due to the irregular traffic impacts caused by the Covid-19 pandemic.

The goal of the 2023 count season was to continue the regular count rotation begun in 2016, where only half of the traffic counts are performed each season, which was continued in 2022. ATS also coordinated with MDT in 2023 to establish the count rotation more accurately, as well as to create an efficient count selection and coordination system. Only the traffic volume totals were collected for each count site (no vehicle speed or vehicle classification data was collected). In total, 84 volume-only sites were counted by ATS in 2023. An additional five locations were counted by MDT on County Roadways. One count site (Collins Drive, 25-7A-038) had data collected but was out of range and was not included in the final data set.

Traffic count data was collected between the months of July and October. Most traffic counts were performed on weekdays (non-holiday), but the County did request weekend traffic counts in recreational areas along Stemple Pass Road, York Road (recreational portion), Hauser Dam Road, Holter Dam Road, and Little Wolf Creek Road. Of the eight traffic counts performed on the weekends on recreational routes, the traffic volumes were on average 165% of the historic weekday volumes and ranged from 91% of the historic average to 203% of the historic average. The following table shows the percentage difference between historical weekday and weekend traffic collected in 2023:

Site ID	Road	Location	Historic AADT (2009-2022)	2023 Weekend AADT	% Difference
7A-63	Hauser Dam Road	North of Lincoln Rd. East	748	691	92%
7A-64	Hauser Dam Road	South of Lincoln Rd. East	888	971	109%
5-12	Holter Dam Rd.	South of Frontage Rd.	139	231	166%
5-17	Little Wolf Cr. Cyn Rd.	West of S-434	116	237	204%
4-13	Stemple Pass Rd.	West of Marsh Creek Rd.	56	89	159%
4-15	Stemple Pass Rd.	West of S-279	73	144	197%
7A-007	York Road	SW of York	420	826	197%
7A-33	York-Trout Creek Rd.	East of Bar	115	217	188%

The data collected in 2023 was factored to an Annual Average Daily Traffic (AADT) volume using the MDT Portable Vehicle Combined Count Factors. These monthly traffic factors are available from MDT each year for different classifications of roadways. The data provides a monthly factor which is used to determine an accurate AADT

volume using data from any month and contains both monthly and daily factors. The traffic counts conducted in 2023 were factored using MDT data collected in 2023 for more accurate results. The raw data files from the traffic counters were uploaded directly into the MDT count database using the MS2 system (<http://mdt.ms2soft.com/>). Once the data was reviewed by ATS and MDT, it was published on the public MDT traffic data repository at the following link:

(http://www.mdt.mt.gov/publications/datastats/traffic_maps.shtml)

After the traffic data was imported into the MDT database, hourly data reports were created for each site. This data was transferred into a Microsoft Excel database. The factored data was then assembled into a book with the same format used in previous years. The data collected by ATS indicates an overall 3.3% increase (1.7% annual) in traffic volumes from 2021 for the locations counted in 2023 on roadways with more than 400 VPD.

The following is a summary of where most of the traffic variation has occurred within the Helena Valley in 2023. These major roadways (more than 400 VPD) had greater than 10% traffic growth or decrease between 2021 and 2023. The roads with the most significant increases in traffic volumes were Hauser Lake Dam Road (+51%), Applegate Drive (+33%), and Wylie Drive (+21%). A variety of local roads also showed decreases in overall traffic volumes but were not outside of historical averages. The following roads showed a change in traffic volumes of more than +/-10% in 2023:

Site ID	Road	Location	2021 AADT	2023 AADT	% Change
7A-48	Applegate Drive	North of Lincoln Rd.	1,291	1,720	+33%
7B-50	Frontage Dr.	North of Sierra Rd.	636	707	+11%
7C-251	Grizzly Gulch Road	West of Helena City Limits	392	457	+17%
7A-35	Hauser Lake Dam Rd.	North of Timber Trail Drive	411	620	+51%
7A-68	Lake Helena Drive	South of York Rd.	1,190	1,330	+12%
7A-70	Lake Helena Drive	South of Canyon Ferry Rd.	4,211	4,910	+17%
7B-64	Wylie Drive	South of Canyon Ferry Rd.	4,539	5,482	+21%
7A-81	York Road	West of Lake Helena Dr.	2,561	3,054	+19%
7B-42	Birdseye Road	North of Barret Rd.	2,239	1,589	-29%
7B-46	Forestvale Road	East of Green Meadow Dr.	572	464	-19%
7B-43	Franklin Mine Road	West of Green Meadow Dr.	1,012	827	-18%
7B-82	Helberg Drive	North of York Rd.	329	241	-27%
7B-69	Howard Rd.	West of Valley Dr.	507	415	-18%
7B-55	Tizer Drive	South of York Rd.	893	430	-52%
7B-56	Tizer Drive	North of Howard Rd.	475	219	-54%
7B-73	Valley Dr.	North of Howard Rd.	938	700	-25%
7B-71	Valley Drive	North of York Rd.	170	141	-17%
7B-72	Valley Drive	South of York Rd.	692	516	-25%
