

eRecording Information

The Lewis and Clark County Records Department now offers eRecording services.

eRecording enables customers to file and record documents with the Lewis and Clark County Official Records Department via the internet.

Customers no longer need to submit records by express mail, courier or in-person. With eRecording, customers simply scan the original document, convert to an electronic image, add indexing information and electronically submit it to the Clerk's office within minutes.

Contact any of these vendors to get your office started.
